WELCOME

Dear colleagues, partners, patients and friends,
the Associazione Riabilitatori dell’Insufficienza Respiratoria (ARIR) is organising its own 4th congress in Treviso, Italy, on next March 21-23, 2019. This congress offers the opportunity to meet colleagues from Europe and worldwide who are interested in enhancing knowledges and sharing experiences to improve Respiratory Care and promote applied technology development in our common field. Lecturers will share their clinical and practical experience at workshops, practical symposia and roundtable discussions. Creative and innovative issues in Respiratory Care will be presented during plenary sessions while in the exhibition hall will be shown to you the latest Respiratory Care technologies and related therapies.

Treviso is one of the most famous italian cities in the North-East, rich in art and history, cradle of some of the best Italian enologic and gastronomic traditions and home of Prosecco wine.
We will be very pleased to welcome you in Treviso!

ARIR PROFILE

ARIR has been founded in 1989 by a group of Physiotherapists who want to be the voice of professionals who work in Respiratory Care and contribute to develop this profession ensuring high quality training and continuing medical education, aim to promoting discussion between those were working in Respiratory Physiotherapy and Pulmonary Rehabilitation. The multidisciplinary and Evidence-Based-Medicine approach are the preferred paradigms for pursuing the above objectives.

In the last 15 years, ARIR created significant branches of interaction and collaboration with associations involved in the field of Physiotherapy and Pulmonary Rehabilitation. ARIR organizes continual medical education opportunities with the physiotherapists members of the Società Italiana per lo studio della Fibrosi Cistica (SIFC) and with the Associazione Italiana Fisioterapisti (AIFI). ARIR was a founder of the European Respiratory Care Association (ERCA) and since 2002 has been affiliated with the American Association for Respiratory Care (AARC) and the Associazione Italiana Pneumologi Ospedalieri (AIPO).

One other relevant initiative made by ARIR is the post-graduate first level master degree on Respiratory Physiotherapy and Pulmonary Rehabilitation, which is now at the thirteen edition and has trained more than 200 italian and foreigner respiratory physiotherapists. This initiative contributes concretely to the commencement of this discipline in Italy.
